RE: Facility ID No. 011-00027, Nonpareil Corporation, Blackfoot
Completeness Determination of PTC Application, East Boiler replacement project

Dear Mr. Suthers:

On April 14, 2008, the Department of Environmental Quality (DEQ) received a 15-Day Pre-Permit Construction Approval application from Nonpareil for the East Boiler replacement project located at the potato processing plant in Blackfoot. The application materials have been reviewed, and the application determined complete. Therefore, DEQ will proceed with the processing of this permit application in accordance with IDAPA 58.01.01.200 (Rules for the Control of Air Pollution in Idaho)(Rules).

Although the application has been declared complete, it may be necessary to solicit further information to assist us during our review. The permit evaluation phase may take up to 60 days, although the application will be processed as expeditiously as our resources allow. Please be aware that you may submit a written request to DEQ to provide a draft permit for review prior to issuance of a final permit in accordance with IDAPA 58.01.01.209.01.b.i. (Rules).

If you have any questions about this letter or about the air quality permitting process, please contact me at (208) 373-0502 or Morrie.Lewis@deq.idaho.gov.

Sincerely,

Morrie Lewis
